PROFILE

I am a dedicated data analyst with a passion for turning data into actionable insights. I have a strong background in data collection, analysis, and visualization, and I'm committed to helping organizations make informed decisions through data-driven solutions.

WORK EXPERIENCE

09 2017 – 08 2021

Nigeria

Coordinator / Girls Coding

I'm an expert in curriculum creation, mentorship, and building inclusive learning environments, with a passion for nurturing the next generation of female programmers and promoting diversity in the tech sector.

10 2021 – 12 2021

Front- End Software Developer / Phynix Media Limited.

Using HTML, CSS, and JavaScript, I constructed responsive web interfaces; I worked with designers and back-end engineers; I optimized performance; developed responsive web applications for businesses.

06 2022 – 11 2022

Glasgow, United Kingdom

Intern / Code Division

During my internship, I worked on sharpening my knowledge as regards my skills in the aspect of data analysis. During this period, I built regression models and also worked on core analysis projects to drive business insights using several tools, from Excel to Python and business intelligence tools.

01 2023 – 10 2023

United Kingdom

Healthcare Assistance / Caring Hearts Scotland

Developed and implemented individual care plans based on assessments and in consultation with
